Comments: The municipality has published a number of tender notices on its website applicable to the period under review. These notices only contain information regarding submission timeframes and the location of the department where more information about the tender will be provided. The first hyperlink does not connect you directly to these tender notices, it only takes you to the page on the website where you have to manually click on the tenders/RQF section in order to view the tender notices. See below an example of what appears once you click on the tenders/rqf section.

Comments: The municipality publishes information about who wins tenders but not within a five day working period. The municipality publishes this information after a couple of months the tender has been awarded. For example, in the source above, the tenders were awarded on different dates and months in 2019. However, the information was published on the website on the 20th of February 2020. See below an example of this. This information is not published on the eTender portal.

(accessed on 3 November 2020)

Comments: The municipality does publish the price of the contract. In the source above, the amounts of several contracts are provided. Although this project is only considering big contracts with a starting value of over R200 000, the municipality publishes the prices of contracts awarded that fall below the value of R200 000.

- 7. Does the municipality publish any information on how the project will be implemented, for instance, timelines and deliverables, otherwise known as service delivery agreements or implementation plans?**
- Yes, the municipality publishes information on how the project will be implemented.

- b. Yes, the municipality publishes information on how the project will be implemented, but the list of service delivery agreement or implementation plans has obvious gaps or the list seems incomplete.
- c. No, the municipality does not publish information on how the project will be implemented.

Answer: C

Source: <https://www.amahlathi.gov.za/tenders-rfq/>

Comments: The municipality does not publish information on how the project will be implemented. The website of the municipality does not have a section/page containing information about service level agreements or implementation plans. Also, this information is not published on the eTender portal. See below what appears on the website once you click on the tenders/RQF page.

8. Does the municipality publish procurement information on both its website and the eTender portal?

- a. Yes, the municipality publishes procurement information on both its website and the eTender portal.
- b. Yes, the municipality publishes procurement information on both its website and the eTender portal but the information on these two platforms does not correspond.
- c. No, the municipality only publishes procurement information on either its website or the eTender portal.
- d. No, the municipality does not publish procurement information on either its website or the eTender portal.

Answer: B

Source:

Comments: The municipality publishes information on its website and the eTender portal. However, the information on the website is much more extensive than the one published in the eTender portal. See examples below

General assessment:

a) What is your overall impression on how easy it is to navigate the municipal website to find procurement information? Rate out of 10?

It was relatively easy to navigate through the website after a few clicks. Some of the information I was looking for is available but it is not organised properly. I give the municipality a 6/10.

b) Any tips on how the municipality could improve citizens' access to procurement information on its website?

I would suggest the municipality create categories within its procurement page in a logical and clear manner. For example, tenders awarded are grouped together with bid registers from previous years. Also, the municipality should consider publishing tender notices containing relevant information on its website.

c) Are there any best practices in the municipality which can be shared with other municipalities?

This municipality extensively publishes the list of names of companies that have been awarded tenders quite regularly.

d) Are there any other issues that caught your attention when undertaking the assessment?

Not really, I think an ordinary member of the public trying to access procurement information on this website should exercise patience as it requires a few clicks for one to begin to understand how the website functions and where the information is located.
