RESEARCHERS BOOTCAMP

EDUCATION RESEARCHERS RESPOND TO LOCKDOWN

DATE 30 March - 30 April

NUMBER OF RESEARCHERS

12

APPROACH

Online research, quantitative and qualitative surveys

AUDIENCE

policy makers; parent-teacher bodies; education resource developers and publishers

PLATFORMS USED

Google Hangouts, Google Forms, WhatsApp, and various online websites and apps

PURPOSE: To contribute to finding solutions to the pressures placed on education systems during times of crisis, by investigating the best mega, meta- and micro-level education strategies.

FINDINGS

Due to socio-economic constraints, poorer households have far less access to online resources and the data needed to use them.

Many online resources exist, but there is dearth of offline resources.

Many
resources exist for
Mathematics and
Science, but fewer
for more specialised
subjects and for
learners with
special needs.

Lockdown has exacerbated the inequality gap in the South African education system. By better understanding what resources are being used for teaching and learning, the government can put strategies in place

to provide equal

access for all.

More than
half of learners took
their workbooks or
textbooks home
when schools closed,
indicating access to
an offline source of
study material.

Most children
in all provinces are
continuing with their
studies during the
lockdown, with most
parents assisting
them.

Much of the resource material found was practical, engaging and interactive.

Provide, and safely distribute, offline resources that can be accessed by all learners.

Include interventions for learners with special needs in planning.

Consider a structured way of using WhatsApp for teaching and learning purposes.

1ENDATIONS TO DB

Communicate with parents and caregivers on how best to support learners.

Ensure that the curriculum-recovery strategy makes provision for all learners.

Project Lead: Milisa Janda; Co-Lead: Dina Mashamaite; Peer Reviewers: Henre Benson and Tamlynn Fleetwood; Researchers: Lungelo Dakile, Somila Dayile, Milisa Janda, Harries Mampenyane, Herman Meyer, Nhlanhla Ngulube, Pertina Nyamukondiwa, Kapil Ramisur and Tsholofelo Setati
